Java

```java
class Solution {
    public int largestInteger(int[] nums, int k) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} nums
 * @param {number} k
 * @return {number}
 */
var largestInteger = function(nums, k) {

};
```

TypeScript

```typescript
function largestInteger(nums: number[], k: number): number {

};
```

C++

```cpp
class Solution {
```

```cpp
public:
    int largestInteger(vector<int>& nums, int k) {

    }
};
```

C#

```csharp
public class Solution {
    public int LargestInteger(int[] nums, int k) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun largestInteger(nums: IntArray, k: Int): Int {

    }
}
```

Go

```go
func largestInteger(nums []int, k int) int {

}
```
